

**REMARKS**

As noted above, the foregoing amendment was faxed to the Examiner pursuant to the undersigned's request. This amendment in effect incorporates the subject matter into rejected claim 1 that defines the pivotal connection being comprised of a cylindrical projection on one of the pivotally connected components that is received in a correspondingly shaped opening in the other component, the opposite of that shown in the Onoue reference relied on in the Final Rejection. Entry is therefore most respectfully requested.

Respectfully submitted:
